

Item-#: BD-Outdoor

Detailed information can be found at www.lefima.de

As always the focus is on the sound. Only the highest grade woods are selected for their tried and tested tone producing qualities. Over 160 years of drum building experience with a harmonious coordination of depth and diameter result in shells of superb quality.

Our “Outdoor Festival” range was conceived with an emphasis on weather-insensitive and low-maintenance design. The outside shell is coated with acoustioating, specially developed to be both completely waterproof and resistant to mechanical damage and scratches. acoustioating is constituted in such a way that it does not hinder the shell vibration but allows the sound to project and develop freely.

Design features

Shell made from birch, rims from tempered high-quality steel, hand polished chromed fittings, wing-screws, extra sturdy casted claw hooks with integrated tension screw insulators and rim protectors.

Item-#	Shell/Bowl (Inch)	Shell/Bowl (cm)	Heads	Tension Screws	Shell material
